PASSION

TECHNOLOGY

INNOVATION

**“Created by athletes,
for athletes”**

VISION &

PHILOSOPHY

We believe that thanks to our strong passion combined with many years of experience in Olympic sports, we can be certain of the uniqueness and effectiveness of our new products.

By combining our passion with technological knowledge, we create products which change the health and lives of people.

We believe that innovations which change the world can only be developed through the cooperation of people from diverse backgrounds and an exceptional focus on the product.

CONCEPT - CLOCK LINE

The concept of functional Quincy Sport equipment was conceived in 2011 and is a combination of passion, technology, and a unique style of products. Thanks to the synthesis of these features, our products are available in 120 countries around the world.

The Quincy Sport team includes 7 Olympic medalists, who want to share with users their decades of experience. Products from these lines are designed to meet the requirements of both professionals and those who are just beginning their adventure with functional training. According to research conducted in gyms, only 2% of people were able to do exercises that were dedicated to other constructions available on the market. Let's be honest... What percentage of people you know can do 10 different exercises related to pull-ups on a bar? Quincy Sport has focused on the remaining 98%, and dedicated hundreds of low and medium difficulty exercises to this extensive group. Of course, all this was done without any losses for professional athletes. All our equipment has been optimised for personal, circuit, and group training.

An additional goal of the project was to enable users to individually configure all our equipment, taking into account their preferences and the space available in the gym. As a result, over 1000 individually tailored device configurations have been created, which have one common feature - unparalleled functionality.

EDUCATION

Along with all products from the Clock, Aquatic Ecosystem and Clock Competition lines, users receive a training package describing all the available training possibilities. In addition, the Global Master Trainer can conduct training
anywhere in the world, where he will show the capabilities of each piece of equipment and suggest the most effective ways of using them for personal, group and circuit training.

Clock™ Line

Clock Line is the first and the most exclusive line of Quincy Sport products. It is based on the Iron Halo System™, which has revolutionised the method of mounting additional accessories and training components. Each device is equipped with an hourglass made of stainless steel, which users describe as a work of art. The whole concept has been designed in such a way that its elements create the most functional construction in the world.

Pages 20-53

Aquatic Ecosystem™ Line

Aquatic Ecosystem is an innovative, functional training system which includes endless product configuration options depending on the user's training needs and available space. Aquatic Ecosystem allows the selection of over 100 accessories and shelves for storing products used in training. Aquatic Ecosystem has shelves for all popular accessories, including: TRX, Stroops, BOSU, Quincy Sport, Vipr, medicine balls, gymnastics balls, gym mats, foam rollers, dumbbells, kettlebells, etc.

Pages 54-85

Clock Competition™ Line

Clock Competition is a line of products in which a consensus between functionality and cost- effectiveness has been achieved, while maintaining the elite quality of the Clock line. All the structural columns of these products have been made entirely of high quality stainless steel, which guarantees that the device will look attractive even after many years of intensive use.

Pages 86-107

ATION
REFLEX

IRON HALO™ SYSTEM

The Iron Halo System™ (IHS™) is a technological breakthrough in functional and strength training equipment. It is certainly this technology that makes the products with IHS™ so popular among customers.

Iron Halo System™ is made entirely of stainless steel, thanks to which it has a tremendously long life span, as well as a much higher load resistance than in products made of ordinary steel. The arrangement of the system allows it to be used in various forms, for example, as a squat stand, a mechanism for attaching Quincy accessories, a tool for rope pulls, and as a rack for training accessories. Thanks to the application of the Iron Halo System™, products with this system do not contain any visible holes in their construction. In addition to the visual effect, IHS™ significantlyincreases the strength of structural columns.

Quincy offers dozens of accessories which are dedicated to IHS™ and have a compatible mounting system. Thanks to this system, each accessory is inserted extremely quickly and efficiently - by movement along a single axis.

As stands for sit-ups, etc.

For attaching training accessories.

For attaching Quincy accessories.

For rope pulls.

For mounting the Iron Halo Bar.

HOURGLASS

The hourglass is a beautiful addition to the Clock device, but it also has several other functions.

It is mounted above the climbing ropes, and serves as a target the user has to reach and turn by climbing to the top. It can also be used in a competition for two users.

When mounted in other places, it can be used to measure the time of the entire training, for an individual or a whole group.

In circuit training, the hourglass functions as an element that should be turned as a break between particular stations or entire series.

The hourglass measures an equal 1 hour.

You can view the hourglass on the Quincy Sport channel on Youtube or after scanning the following code using a QR reader:

Your Color

- Your gym does not have enough room for the standard versions of our devices?
- Are you looking for a different shape of the device?
- Are you looking for a larger device that will fill your gym's free space?

Our design department will prepare a free visualization of your idea for you.
Just follow these steps:
1) Write to us at design@quincysport.com and precisely describe your idea.
2) Send us your a layout plan of your gym. It can be a professional layout by a designer or a simple drawing on a piece of paper which has been scanned or photographed. Remember to include the basic dimensions of the room.
3) Additionally send us 3 photos or a short video so that our design department will have a general idea of the room's layout.

Plyometric Platform

The Plyo Platform by Quincy is used for lower body exercises - especially jumping exercises.
It is characterised by three main aspects:
1) It has no sharp edges, therefore there is no risk of injuring your tibia or knee due to a failed jump.
2) The user jumps on a soft pad absorbing the jump, not on a metal sheet or rubber.
3) The Plyo Platform can be easily installed even by beginners. All you have to do is smoothly insert it into the Iron Halo System.

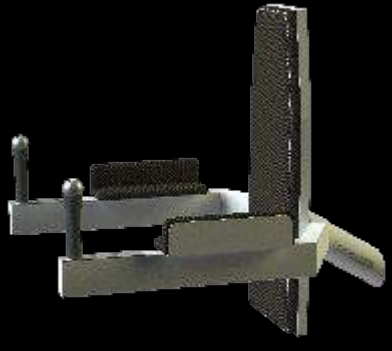

Dip

Dip by Quincy is used for upper body exercises.
It is characterised by three main aspects:
1) It offers the possibility of doing exercises in 3 different width settings, which means users can choose the best setting for themselves.
2) Dip is made of strong rectangular profiles, which ensure safety and durability.
3) Dip can be easily installed even by beginners. All you have to do is smoothly insert it into the Iron Halo System.

Abdominal Muscle

Abdominal Muscle is used for abdominal exercises.
It is characterised by three main aspects:
1) 3 different hand position can be set and locked.
2) All dimensions were matched to the anatomy of the body, and the device has been tested by Olympic medalists.
3) Abdominal Muscle can be easily installed even by beginners. All you have to do is smoothly insert it into the Iron Halo System.

Abdominal Bench

The Abdominal Bench by Quincy is used for abdominal muscle exercises.
It is characterised by three main aspects:
1) The bench has a unique shape that matches the anatomy of the user's body, and the final shape of the Abdominal Bench was created after numerous consultations with Olympic medalists.
2) The Abdominal Bench can be easily installed even by beginners. All you have to do is smoothly insert it into the Iron Halo System.
3) The product has wheels in its lower part which facilitate installation.

Put Off Single

Put Off Single is an original Quincy product. It is used for general-purpose fitness exercises with a medicine ball that cannot be done on any other device. Once installed in one of many different positions in the Iron Halo System, it provides the user a perfect place for speed and strength training. Put Off Single can be easily installed even by beginners. All you have to do is smoothly insert it into the Iron Halo System.

Put Off Double

Put Off Double is an original Quincy product. It is used for general-purpose fitness exercises with a medicine ball that cannot be done on any other device. Once installed on one of many different positions in the Iron Halo System, it provides the
user a perfect place for speed and strength training. Put Off Double can be easily installed even by beginners. All you have to do is smoothly
insert it into the Iron Halo System.

Safety Spotter Arms

Safety Spotter Arms by Quincy are the most powerful products of their type on the market and are used to ensure the user's safety.
Safety Spotter Arms are 2 feet (60 cm) long, which means they can be easily adjusted to different people and exercises. The UHMW material ensures that the bar is completely protected from damage.
Safety Spotter Arms can be easily installed even by beginners. All you have to do is smoothly insert them into the Iron Halo System.
Safety Spotter Arms are sold in pairs.

Iron Halo Bar

The Iron Halo Bar can be installed on the rear side of the Iron Halo System, and its functionality depends only on the user's imagination. The device is made of a thick-walled tube, which makes it strong enough to withstand all the acrobatics performed on it.
The Iron Halo Bar can be used for both the most complex acrobatic exercises as well as simple exercises such as low-angle push-ups. It is the perfect device for everyone.

AQUATIC ECOSYSTEM MILITARY CAMOUFLAGE DOUBLE 200 IN

Military camouflage is the use of camouflage by an armed force to protect personnel and equipment from observation by enemy forces. In practice, this means applying colour and materials to military equipment of all kinds, including vehicles, ships, aircraft, gun positions and battledress, either to conceal it from observation (crypsis), or to make it appear as something else (mimicry). The French slang word camouflage came into common English usage during World War I when the concept of visual deception developed into an essential part of modern military tactics.

Military camouflage patterns have been popular in fashion and art from as early as 1915. Camouflage patterns have appeared in the work of artists such as Andy Warhol and Ian Hamilton Finlay, sometimes with an anti-war message. In fashion, many major designers have exploited camouflage's style and symbolism, and military clothing or imitations of it have been used both as street wear and as a symbol of political protest.

AQUATIC ECOSYSTEM BERLIN PINK PIPES DOUBLE 200 IN

What are these pipes for? Are they an art installation? Do they carry oil? What are these pink pipes doing all over Berlin? These are some of the most common questions guides are asked by first-time visitors. There are 60 km of these pipes in Berlin! What are they?

Berlin Pink Pipes transport groundwater to the River Spree and other canals. Berlin was built on top of a huge swamp, which means ground water must be constantly pumped out of construction sites.

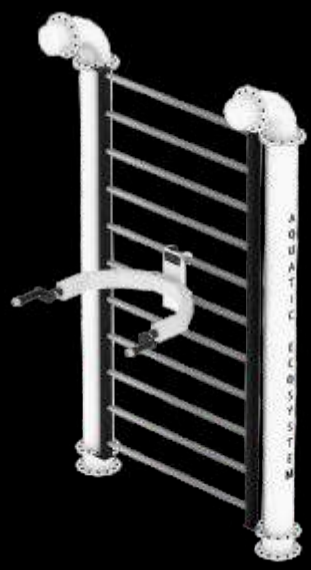

But why pink?
Pollem company, responsible for installing the pipes, decided to consult scientists and psychologists to determine the friendliest color. They found that children's favorite color is pink, and additionally, adults also like this color as it makes them think of happiness and youth. The results of this research led to repainting the whole 60 kilometers of pipes pink, which turned them into another Berlin's landmark.

IVE

WHAT IS IVE?

IVE is a recreational device for outdoor training for every age group and every user level - from teenagers, through adults and seniors, to professionals. IVE devices have an innovative solution of load regulation, thanks to which adjusting the weight to your training capabilities is extremely simple, fast and safe.

VISION

Provide safe and effective outdoor training for users of all ages.

MISSION

We are here to provide training opportunities for the entire community of people who want to spend their time outdoors actively.

OUR STORY

IVE is a brand of recreational equipment for outdoor training, designed by Quincy, which has 10 years of experience in designing innovative sports equipment, and several million users in over 110 countries train on Quincy products.

IVE iGreenMill QUINCY CHAMPIONS LADDER

clock AQUATIC ECOSYSTEM

Ladies and gentlemen,

Wouldn't it be great if you could improve the health and life of thousands of people from the local community with one decision?

IT IS POSSIBLE!

Our solution is the only one in the world that allows to provide the entire cross-section of the local community with effective and safe training, improving their health and life. There are no other external devices with variable load in the world that users can adapt to themselves in a very easy, fast and safe way. This solution guarantees that you will not duplicate other outdoor gyms intended mainly for seniors, and you will ensure the activation of the community, in every age group from 13 to 99 years old.

IVE devices make it possible to develop any local places - regardless of whether the place is a park, housing estate, playground, school, beach or square - IVE devices will perfectly fulfill their role - they will give your places a new life, and they will provide the local community with access to free and unique training to improve their strength, endurance and motor coordination - regardless of their age or level of advancement.

We are only one decision away from improving the health and lives of people in your community.

ABOUT OUTDOOR TRANING

Outdoor training is currently the leading training trend around the world. This trend has been growing from year to year since 2015, but the global events of 2020 (the pandemic) accelerated it several times in a few months.

Until 2020, the problem of the market was that there were no external devices with easy, safe and quick load adjustment before the IVE line, and thus users were forced to train on standard and common devices using their body weight, which did not they have anything in common with ergonomics of movement. IVE solves this problem and gives you the option of weight training that can be adjusted for every age group and every user level.

ADVANTAGES OF IVE TRAINING DEVICES

1) They are available for everyone - young people, adults, seniors and professional athletes.

2) They strengthen the health and condition of local communities.

3) They help in establishing and maintaining relationships between people.

4) They ensure activation and development of local communities.

5) They guarantee relaxation during outdoor training and a flow of endorphins after its completion.

6) They provide free and accessible entertainment.

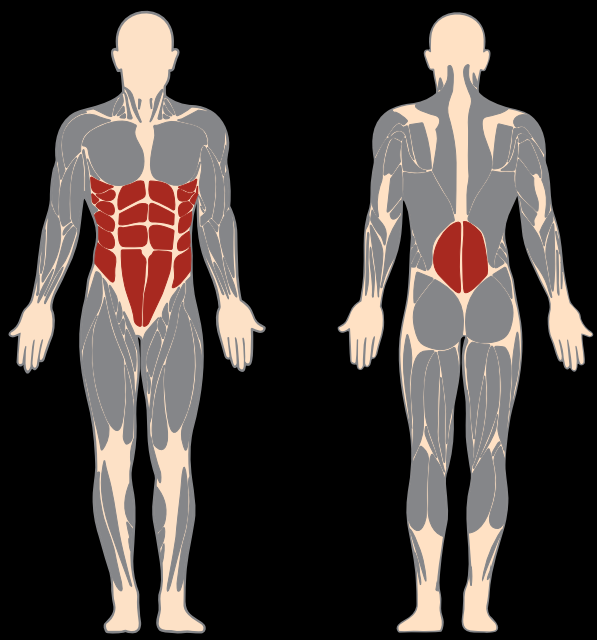

7) They guarantee very positive reception by all city residents.

ABDOMINAL MUSCLE

EXERCISES

SPECIFICATION

Length	213 cm / 7’0’’
Width	96 cm / 3’2’’
Heigth	154 cm / 5’0’’
User height	+ 140 cm / 4’7’’
User age	+ 13 years
Safety area	20.31 m² / 218.61 ft²
Standard	EN 16630:2015-06E
Certificate	CE / EU Declaration of Conformity
Material	Stainless Steel
Weight adjustment	5 kg - 60 kg (x 5 kg) / 10 lbs - 130 lbs (x 10 lbs)

A device for abdominal muscle training which develops abdominals, obliques, and back muscles.

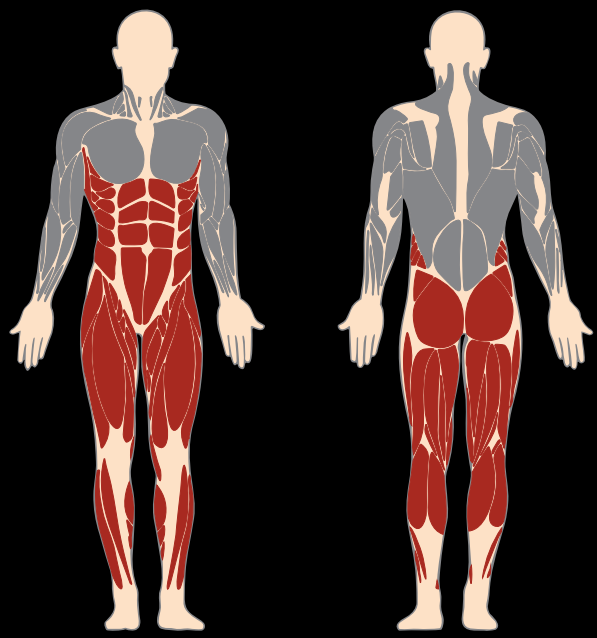

1) Made entirely of stainless steel.
2) Load adjustment by moving the discs along pipes arranged perpendicularly and centrally in the axis of the exercising person.
3) Adjustable load from 5 kg to 60 kg with a difference of 5 kg.
4) Discs are protected against theft by the use of anti-theft screws, which require special tools to be removed.
5) The movement of the device is based on the mechanism of four stainless steel bearings.
6) Instruction plates made of 3 mm thick dibond, printed in UV technology, laminated with polyurethane.
7) Backrest made of waterproof polyethylene with an additional UV-absorbing screen.
8) Dimensions: length 213 cm / width 96 cm / height 154 cm.
9) Designed for one person - up to a maximum of 180 kg.
10) Accuracy class: A - high accuracy.
11) Class of use: S - for professional or commercial use.

User age	+ 13 years
Safety area	19.86 m² / 213.77 ft²
Standard	EN 16630:2015-06E
Certificate	CE / EU Declaration of Conformity
Material	Stainless Steel
Weight adjustment	5 kg - 120 kg (x 5 kg) / 10 lbs - 260 lbs (x 10 lbs)

A device for squat training which develops quads, glutes, hips, calves, and back muscles.

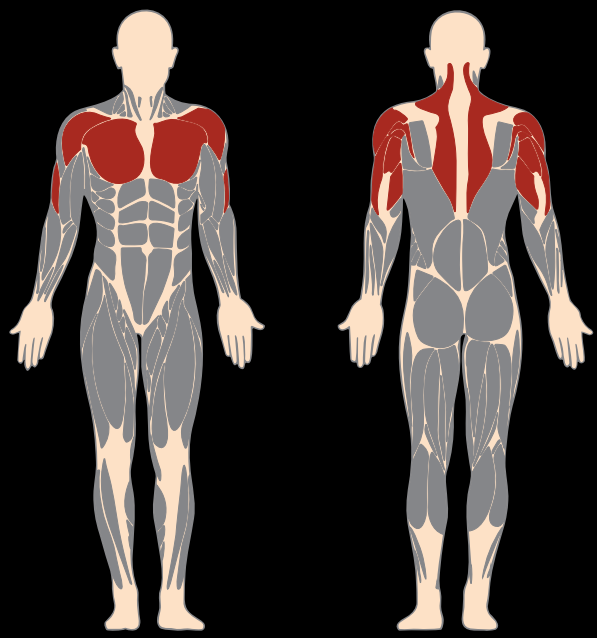

1) Made entirely of stainless steel.
2) Load adjustment by moving the discs along pipes arranged perpendicularly and centrally in the axis of the exercising person.
3) Adjustable load from 5 kg to 120 kg with a difference of 5 kg.
4) Discs are protected against theft by the use of anti-theft screws, which require special tools to be removed.
5) The movement of the device is based on the mechanism of two stainless steel bearings.
6) Instruction plates made of 3 mm thick dibond, printed in UV technology, laminated with polyurethane.
7) Possibility to set the starting position at 5 different heights.
8) Dimensions: length 199 cm / width 98 cm / height 150 cm.
9) Accuracy class: A - high accuracy.
10) Class of use: S - for professional or commercial use.

2) Load adjustment by moving the discs along pipes arranged perpendicularly and centrally in the axis of the exercising person.
3) Adjustable load from 5 kg to 60 kg with a difference of 5 kg.
4) Discs are protected against theft by the use of anti-theft screws, which require special tools to be removed.
5) The movement of the device is based on the mechanism of two stainless steel bearings.
6) Instruction plates made of 3 mm thick dibond, printed in UV technology, laminated with polyurethane.
7) Possibility to set the starting position at 7 different heights.
8) Backrest and seat made of waterproof polyethylene with an additional UV absorbing screen.
9) Handles enabling the device to be gripped in three positions (two horizontally - one vertically).
10) Dimensions: length 225 cm / width 80 cm / height 147 cm.
11) Designed for one person - up to a maximum of 180 kg.
12) Accuracy class: A - high accuracy.
13) Class of use: S - for professional or commercial use.

LAT PULLDOWN

EXERCISES

SPECIFICATION

Length	290 cm / 9’6’’
Width	95 cm / 3’1’’
Heigth	168 cm / 5’6’’
User height	+ 140 cm / 4’7’’
User age	+ 13 years
Safety area	23.30 m² / 250.79 ft²
Standard	EN 16630:2015-06E
Certificate	CE / EU Declaration of Conformity
Material	Stainless Steel
Weight adjustment	5 kg - 80 kg (x 5 kg) / 10 lbs - 170 lbs (x 10 lbs)

A device for back (pulldown) training which develops back, chest, shoulders, biceps, triceps, and forearms muscles.

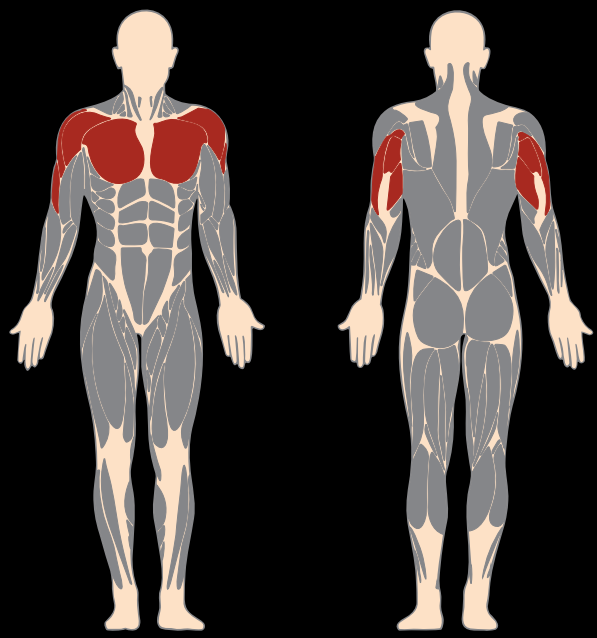

1) Made entirely of stainless steel.
2) Load adjustment by moving the discs along pipes arranged perpendicularly and centrally in the axis of the exercising person.
3) Adjustable load from 5 kg to 80 kg with a difference of 5 kg.
4) Discs are protected against theft by the use of anti-theft screws, which require special tools to be removed.
5) The movement of the device is based on the mechanism of two stainless steel bearings.
6) Instruction plates made of 3 mm thick dibond, printed in UV technology, laminated with polyurethane.
7) Possibility to set the starting position at 7 different heights.
8) The seat is made of waterproof polyethylene with an additional UV absorbing film.
9) Handles enabling the device to be gripped in two positions (one horizontally - one vertically).
10) Dimensions: length 290 cm / width 95 cm / height 168 cm.
11) Designed for one person - up to a maximum of 180 kg.
12) Accuracy class: A - high accuracy.
13) Class of use: S - for professional or commercial use.

COLORS

IVE devices in the basic version are made of polished stainless steel, thanks to which we obtain a beautiful and extremely durable structure. The lack of additional varnishing also allows the product to maintain a perfect appearance for as long as possible, because in this way we eliminate all possible mechanical damage to the varnish coatings that can always occur in public utility products.

However, at the customer's request, we varnish our products in all available RAL colors and colors with the "HAMMER" structure. Below you can see 14 basic and most frequently used colors. In example number 15 there is a QR Code link to the website www.ralcolor.com, which shows all available RAL colors.

ECOLOGY
ENVIRONMENT
SOCIAL RESPONSIBILITY

- WARRANTY

We are so certain of the quality of our devices that we set a 10-year commercial warranty for their integrity. We were not interested in extending the warranty for twice as long as is the standard in the business - we just extended it over 5 times!

- PRODUCT LIFE CYCLE

21 YEARS is the guaranteed life cycle of the product. In that time, we guarantee availability of all spare parts for our devices.

- MATERIALS

The constructions of our devices are produced 100% from stainless steel, due to which we eliminated entirely other, less durable materials.

- ENVIRONMENT

Users do not need electricity, air conditioning or heating to train outside. All they need is the will to train.

1st STEP - Training in an iGreen Gym.

What is an iGreen Gym?
It's a modern outdoor gym with unique IVE training devices.

What are IVE devices?
IVE are recreational devices for outdoor training for every age group and every user level – from teenagers, through adults and seniors, to professionals.
IVE devices use an innovative approach to load regulation, thanks to which adjusting the weight to your training capabilities is extremely simple, fast and safe.

2nd STEP - iGreen Gym in your city!

Why do you need iGreen Gym?

1. Sports equipment experts describe iGreen Gym as the gym of the future: essential for the health and life of entire societies in both these current pandemic and the eventual post-pandemic times.

2. The pandemic has caused enormous health problems, not only during, but also after the lockdowns, as people first stopped doing physical activity in closed spaces, afraid of potential infections and then simply fell out of the habit of regular training. The average number of people training in fitness clubs worldwide has decreased by 60%, and the industry predicts that this trend will continue throughout the pandemic.

3. The declining health level of the population combined with a significant increase in average weight can only be countered by providing the largest possible group of recipients with effective training alternatives. The iGreen Gym initiative will definitely reverse these terrifying health trends and will help improve the health of every local community.

4. The iGreen Gym initiative will also take care of the youngest group in our communities, i.e. children and teens aged 13-18. iGreen Gyms will give this group access to full-value sports training and will help build healthy behavior patterns for the future.

How are the IVE devices included in an iGreen Gym special?

1. The magic of IVE devices is the how they enable any age group and any user level to train, from teens, through adults and seniors, to professionals.

2. The ability to change the load on the devices allows you to set any level so anyone can perform a full-fledged strength training.

3. With the ability to adjust the load, you can start training with as little as 5 kg, which allows beginners and elderly people to train, and can offer a full warm-up for people with more training experience.

4. The devices are designed carefully taking human anatomy into account, which practically excludes the risk of any injury.

5. Every device provides a comfortable and correct training position which is safe for joints and muscles.

6. A set of 7 IVE devices makes it possible to every muscle group.

7. IVE devices are aesthetically valuable – the devices look modern and can even be seen as authentic contemporary art – designers call them "DINOSAUR LOOK" and "JURASSIC GYM."

What are the benefits of iGreen Gym training in the local community?

1. Significant improvement of health.
2. Building stamina.
3. Improving posture.
4. Fat reduction.
5. Improving skin firmness.
6. Improving muscle strength and endurance.
7. More energy.
8. Increase in self-confidence.
9. Natural antidepressant.
10. Positive effect on well-being.
11. Slowing the aging process.
12. Better brain function.
13. Stronger bones and preventing osteoporosis.
14. Reducing the side effects of menopause.
15. Improving sleep quality.
16. Reducing everyday stress.
17. Learning self-discipline and strengthening motivation.

3rd STEP – Differences between an iGreen Gym and standard outdoor gyms.

What is the difference between an iGreen Gym and a standard outdoor gym?

An iGreen Gym has a real impact on the health and fitness of the community. The option to adjust the load on the devices allows for effective training that really promotes good health. Users will never again have to struggle with standard outdoor equipment that requires them to lift their body weight in positions which do not promote healthy joints.

No more discrimination! Standard outdoor equipment discriminates against overweight people who are unable to lift their own body weight. The IVE devices included in the iGreen Gym do not have this issue because the user does not have to be able to lift their body weight, as the variable load regulation starts from 5 kg.

Warm-up and training safety is a very important point in considering the differences between iGreen Gym vs a standard outdoor gym. Standard outdoor devices, based only on lifting body weight, don't let users divide the load and so they make warm-up exercises impossible. The lack of adjustment forces users to rapidly start exercising with the weight of their own body, which often results in a dangerous burden being put on insufficiently warmed up muscles and joints. An iGreen Gym allows you to train in a much safer and, above all, effective way – a smooth change of load allows people of all weights, ages and levels to train.

Differences

iGreen Gym by IVE	**Standard Outdoor Gym**
Adjustable Weight	Body Weight
Regardless of how much you weigh - you can lift any weight from 5 kg up.	If you weigh 80 kg, you lift 80 kg.
	
Option to adjust the load to individual training preferences.	No option to adjust the weight - users must lift their own body weight.
The option to start training from 5 kg lets beginners and the elderly train and lets people with more training experience perform a full warm-up.	The lack of adjustment forces users to rapidly start exercising with the weight of their own body, which often puts a dangerous stress on muscles and joints.
No discrimination against overweight people - on IVE devices, such people can choose any load, starting from 5 kg.	Standard devices discriminate against overweight people who are unable to lift their own body weight.
IVE devices are characterized by correct natural training movements consistent with the human anatomy and the biomechanics of the training movement.	Training based on lifting (without warming up) your body weight through uncoordinated device movements does not account for the anatomy and biomechanics of the training movement.
Locations with IVE devices are often filled with people training. An iGreen Gym can become a meeting place for the local community, not only a place for training.	Locations with standard weight lifting equipment are often referred to as "GHOST GYMS." Most locations are empty and unused most of the day.
IVE devices are aesthetically striking - the devices look modern and can even be seen as authentic contemporary art - designers call them "DINOSAUR LOOK" and "JURASSIC GYM."	Standard outdoor gyms have become a permanent element of urban architecture, but they do not offer any artistic or visual value.
7 devices let you train all muscle groups: abdominals, obliques, back, legs, glutes, hips, calves, shoulders, biceps, triceps, forearms, and chest.	There are no devices for certain parts of the body - regardless of the number of machines purchased. It is not possible to train every muscle group.

4th STEP - iGreen Gym App.

What is iGreen Gym App?

The iGreen Gym application, available for all users, includes training plans for various groups of recipients. The application can save the workouts performed in the training diary and monitor visits to the iGreen Gym, tracking training progress constantly.

Via the application, you will also learn about group trainings organized at iGreen Gyms and global events for iGreen Gym users.

The virtual trainer will take you on a tour of the gym and give you training tips.

Functions:

1. Training plans for various target groups: youth, adults, seniors, women, men.
2. Each training plan prepared in 3 difficulty segments: beginner, intermediate, advanced.
3. Division of training plans in terms of their duration: 14 days, 30 days, 60 days, 90 days, 365 days.
4. Training plans dedicated to different training goals: fat burning, buttocks firming, etc.
5. Constantly updated and added training videos, led by coaches.
6. A training log that automatically analyzes your training progress.
7. Virtual trainer – a tour of the gym and training tips.

5th STEP - COVID-19 vs iGreen Gym - Feel safe!

Can I exercise outdoors during the COVID-19 pandemic?

YES

Outdoor training practically excludes the possibility of contracting the SARS-CoV-2 virus and is a fantastic alternative to training indoors.

Since March 2020, fitness clubs around the world have lost millions of users who limit their presence to a minimum in all closed spaces with groups of people. This huge group chooses outdoor training as an alternative, as it makes them feel safe.

6th STEP – Ecology / Materials / Warranty

ECOLOGY

Users do not need electricity, air conditioning or heating for outdoor training. All that is needed is the motivation to do it.

MATERIALS

Our devices are made of 100% stainless steel, which allows us to completely eliminate other less durable materials.

WARRANTY

We are so confident about the quality of our devices that we have established a 10-year commercial warranty to guarantee their integrity. We didn't only double the industry standards – we extended it over 5 times!

PRODUCT LIFE CYCLE

21 YEARS is the guaranteed product life cycle, during which time we will guarantee the availability of all spare parts for our devices.

MAINTENANCE

IVE devices are virtually maintenance-free. A 5-minute session every 6 months will be sufficient to keep your IVE device safe and operational.

www.igreenmill.com

1. **iGreenMill** has no restrictions on speed and settings. You can easily go from a slow walk to a full sprint.

2. You can set your own pace depending on your level of fitness and planned training goals.

3. The **iGreenMill** treadmill looks great and has high artistic value – the device looks modern and can even be seen as authentic contemporary art – designers have called it a work of art.

4. **iGreenMill** is made entirely of stainless steel and is therefore resistant to all weather conditions. Enjoy a full-fledged outdoor training in the comfort of your garden or terrace.

5. The **iGreenMill** treadmill is completely maintenance-free. There is practically no need for maintenanace.

iGreenMill - Outdoor Treadmill

iGreenMill is the world's first and only outdoor curved treadmill. **iGreenMill** has a revolutionary roller system that provides an amazing running experience for people of all ages - from children to adults and seniors.

The principle of the treadmill is simple:
You want to go faster - go faster. You want to slow down - slow down. You want to stop - stop.

Just like in life - you are the powerhouse of the **iGreenMill** treadmill. You can freely control your pace thanks to the unique 32 rollers made of Italian stainless steel that work together with you to provide a professional sports experience. The perfectly curved running surface is designed so that the user can walk, run or perform more than 30 other exercises.

Introduce running training into your life on the **iGreenMill** external treadmill. Training on **iGreenMill** guarantees an unforgettable training experience, and in addition, according to research, training on curved treadmills burns 40% more calories than training on standard straight treadmills powered by an

The iGreenMill treadmill offers many training options, including:

1. fat burning
2. buttock training
3. abdominal muscle training
4. HIIT system
5. interval
6. sprint training
7. walking
8. rehabilitation

iGreenMill App

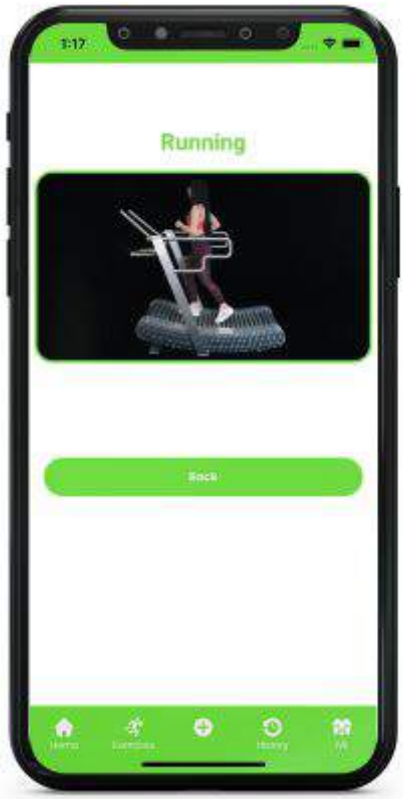

What is the **iGreenMill** App?

The **iGreenMill** application, available to all, includes training plans for various groups of users. The application can save your workouts in the training diary and monitor training on **iGreenMill**, keeping constant track of the training progress.The application will also provide information about group trainings organized on **iGreenMill** and global **iGreenMill** user events.

1. Training plans for various target groups: children, teens, adults, seniors, women, men.
2. Each training plan prepared in 3 difficulty segments: beginner, intermediate, advanced.
3. Various lengths of training plans available: 14 days, 30 days, 60 days, 90 days.
4. Training plans dedicated to various training goals: improving fitness, burning fat, firming the buttocks, etc.
5. Constantly updated and added training coaching videos.
6. Training log that automatically analyzes your training progress.
7. Virtual trainer - analysis of training goals and training tips.

PERMABLOK3®
ADVANCED VINYL PROTECTION

PROTECTION AGAINST GERMS, ABRASIONS, AND STAINS
A vinyl protective coating engineered to create a tough, effective barrier against the three biggest problems encountered in healthcare and hospitality environments: germs, abrasions and stains. You can't see it or feel it, yet the protection it offers results in extended performance and lasting beauty with a minimum of care.

SUPERIOR ANTIBACTERIAL PROTECTION
PERMABLOK3® results in a more hygienic environment because germ counts can be kept down. Importantly, it also guards against the surface growth of fungus, mold, and mildew spores which can cause unpleasant odors, unsightly pink and black stains, even allergic reactions. This means that vinyl treated with PERMABLOK3® not only keeps its good looks, but also remains highly resistant to deterioration such as cracking, splitting, and loss of flexibility. So from any standpoint, hygienic, cosmetic, or structural, PERMABLOK3® offers superior bacterial protection that healthcare and hospitality industries can really count on.

SUPERIOR ANTI-STAIN PROTECTION
When caught quickly, most everyday stains like grease, blood, suntan lotion, crayon, ketchup, and black felt tip pens can be wiped right off vinyl treated with PERMABLOK3®. Just use mild soap and water. For more stubborn stains, a variety of concentrated and solvent type cleansers may be used without damaging the surface. These include alcohol, naphtha, and bleach.

SUPERIOR ANTIFUNGAL PROTECTION
PERMABLOK3® offers unsurpassed antifungal protection by resisting gram positive and gram negative bacteria, filamentous fungi, and yeast.

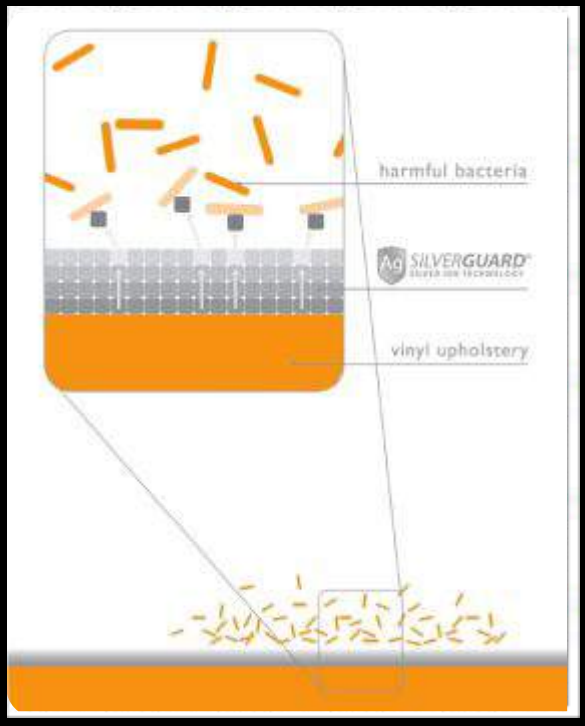

A natural environmentally friendly bacteria-fighting defense to inhibit odor and stain causing bacteria. When combined with PERMABLOK3®, Spradling's patented stainfighting and abrasion-resistant treatment, SILVERGUARD® delivers the ultimate performance solution.

RELIABLE

SILVERGUARD® stays fresh and lasts longer than other silver ion based products due to the proprietary manufacturing process which promotes a controlled release of antimicrobial properties. It continues to provide its bacteria-fighting protection after repetitive cleanings.

EFFECTIVE

The elemental protection of silver in SILVERGUARD® is an antimicrobial agent. It is safe and efficient in diminishing odors, promoting freshness, and extending the life cycle of a product by attacking bacteria and other destructive microorganisms.

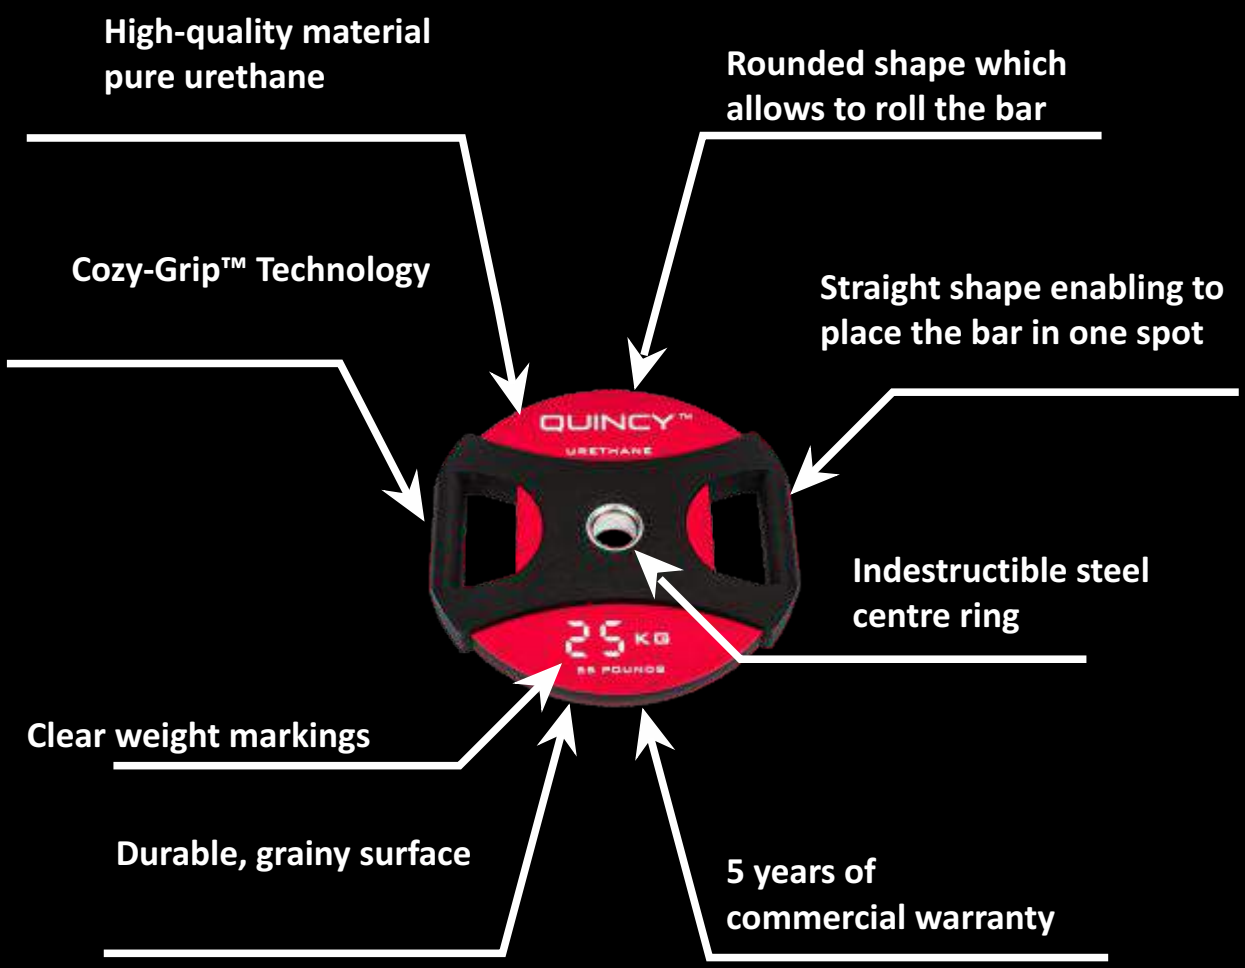

HOW IT WORKS

Silver ions engineered into the unique chemistry of SILVERGUARD®, are highly effective against bacteria because they destroy microorganisms through multiple paths. SILVERGUARD® attacks the bacteria cell wall, disrupts protein metabolism within the cell, and forms complexes with other biomolecules in the cell to alter cell functions. These ions are slowly released out of their inorganic matrix in the presence of moisture. SILVERGUARD® is released as needed to effectively control bacterial growth, while leaving sufficient quantities of SILVERGUARD® to retain antibacterial protection.

URETHANE DISC

Quincy Sport urethane discs are a unique product with unprecedented functionality. They include remarkable features and take advantage of two special technologies. As all Quincy Sport products, these discs were created in collaboration with numerous Olympic medalists, by athletes - for athletes.

The most well-known technology used in these discs is Cozy-Grip™. All discs from this line are equipped with Cozy-Grip™, which enables to perform much more exercises than with standard discs by others brands. The Cozy-Grip™ shape was designed after several years of testing and collecting the parameters of hundreds of athletes, making it fully compatible with the anatomy of the palm. This makes even such a simple and standard procedure as attaching the discs to the bar much easier and safer.

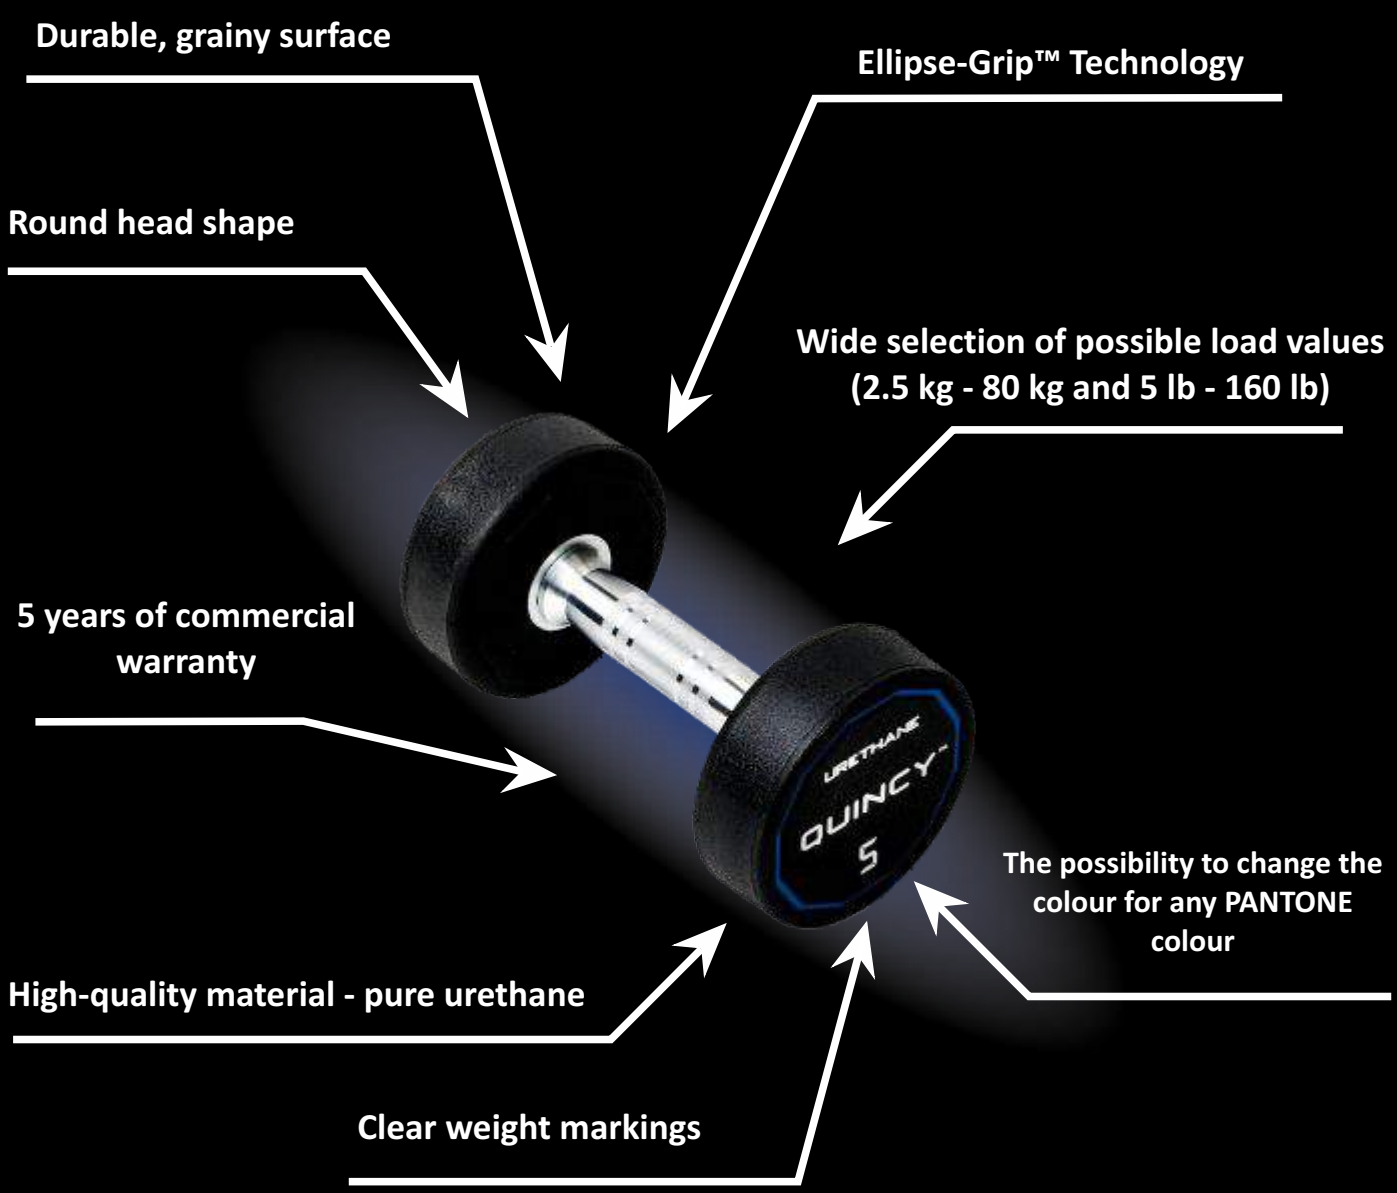

Of course, all discs are covered with pure urethane, with an additional grainy structure that gives them a unique look.

Quincy Sport is confident in the exceptional quality of these discs and provides 5 years of commercial warranty on them. Urethane is an organic chemical compound characterised by extremely high durability. Quincy Sport technologists are specialists in producing urethane products since 2001, when other companies did not even think about using urethane in the manufacturing of
sports equipment.

Urethane is known for its remarkable resistance to external factors, both atmospheric and chemical. It is a very strong substance and therefore is not susceptible to mechanical damage. Even after long and intensive use, the discs will remain in very good condition. Urethane is odourless, which means that by investing in these urethane products you will avoid the worst property of poor quality discs - the smell of rubber.

Brand	Quincy Sport
Name of product	Urethane Discs
Symbol	QS-A-UDISC
Warranty	5 years of commercial warranty
Standard colours	1.25 kg (2.5 lb) - black&black, 2.5 kg (5 lb) - silver&black, 5 kg (10 lb) - white&black, 10 kg (25 lb) - green&black, 15 kg (35 lb) - yellow&black, 20 kg (45 lb) – blue&black, 25 kg (55 lb) – red&black
Optional colours	All discs can be made in silver&black or black&black

URETHANE DUMBBELLS

Our urethane dumbbells, part of the Clock Line of products, have many unique features and take advantage of two special technologies. As all Quincy Sport products, they were created in collaboration with numerous Olympic medalists, by athletes - for athletes.

The most well-known technology used in these dumbbells is Ellipse-Grip™. This is a grip that is fully adapted to the anatomy of the hand, which means you do not need to focus on how to hold the dumbbell during exercise. This grip will do it for you! In addition, the Ellipse-Grip™ design matches the natural curvature of the palm, thereby eliminating technical errors and possible injuries.

The Ellipse-Grip™ is coated with top-quality chrome, making it completely safe. Users do not have to worry about possibly being hurt by chrome falling off. The round head shape allows for doing a wider range of exercises than with hexagonal or twelve-sided dumbbells.

The dumbbell heads are made of pure urethane, with an additional grainy structure that gives them a unique look. Quincy Sport is confident in the exceptional quality of these dumbbells and provides 5 years of commercial warranty on them.

Urethane is an organic chemical compound characterised by extremely high durability. Quincy Sport technologists are specialists in producing urethane products since 2001, when other companies did not even think about using urethane in the manufacturing of sports equipment.

Urethane is known for its remarkable resistance to external factors, both atmospheric and chemical. It is a very strong substance and therefore is not susceptible to mechanical damage. Even after long and intensive use, the dumbbells will remain in very good condition. Urethane is odourless, which means that by investing in these urethane products you will avoid the worst property of poor quality dumbbells - the smell of rubber.

POWER RACK

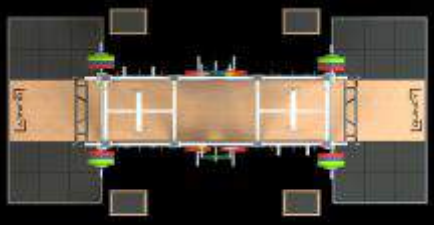

Olympic Power Racks (OPR) is another device designed by Quincy for athletes' training. Olympic Power Racks are based on the Iron Halo System™, which is a revolution in the field of attaching accessories to this type of constructions. The arrangement of this system enables it to be used in various forms, for example, as a barbell rack, a mechanism for attaching Quincy accessories, a tool for rope pulls, and as a rack for training accessories.

Olympic Power Racks are the ideal equipment for all strength and general fitness exercises. Thanks to the creativity of Quincy designers and our long-term cooperation with Olympic medalists from several sports, the number of possible exercises that can be done on the Quincy Olympic Power Racks is virtually unlimited.

Olympic Power Racks are made of carbon steel, with stainless steel elements. The size of the section used for the structural columns is 4- 3/4'' x 3-1/8'' (~ 120mm x 80mm). Olympic Power Racks are manufactured in versions with a training platform and without it. Birch plywood and premium rubber of the highest quality from a specially selected raw material mixture was used to create the platform.

CHAMPIONS CARDIO™

HISTORY

In 2014, the founders of the company Champions Cardio came up with the idea of creating ecosystems of training products that will revolutionize cardio training around the world. We were determined to use the latest technologies such as artificial intelligence, machine learning and Live Streaming.

To achieve such ambitious goals, we needed a large team consisting of people with experience not just from the sports industry, which still designed products according to 20th century standards. For this purpose, we brought together over 50 people, consisting of experts from the automotive, aviation and new technologies industries. The common factor was everyone's love for sports.

After long consultations, we selected Champions Ladder as our first product. Our pace of life is becoming increasingly faster and people are focused on achievements, therefore users require from the cardio products which in 10 minutes can give the effect of spending an hour cycling or running on the treadmill.

GOAL

The goal of our team was to create an ecosystem of cardio products that will revolutionize training around the world through the use of the latest technological advancements. In order to do this, we decided that the most important goal is the ability to influence users around the world during 3D Live Streaming and 3D VOD transmissions. Of course, whenever solutions appear which can change the status quo, the sports industry always says that this cannot be done. However, in such cases it is best to gather experts from other industries who do not know that it can't be done.

CONCEPT

Imagine a situation in which thousands of users from all over the world join a Live Streaming training session run by a coach in a studio in Los Angeles, and the speed and time are controlled in real-time by the trainer. This is our CONCEPT.

CHAMPIONS FAMILY

WHAT IS CHAMPIONS LADDER?

Champions Ladder is a multifunctional climbing treadmill which allows to experience the most beautiful places in the world and join group training via Live Streaming, in which you climb with the trainer. Moreover, you can see and hear the trainer, who in real-time controls the movement and speed of your device. This technology will take your training to another level!

Join one of many Live Streaming training sessions in beautiful and unique locations or play a recorded session at any time in VOD.

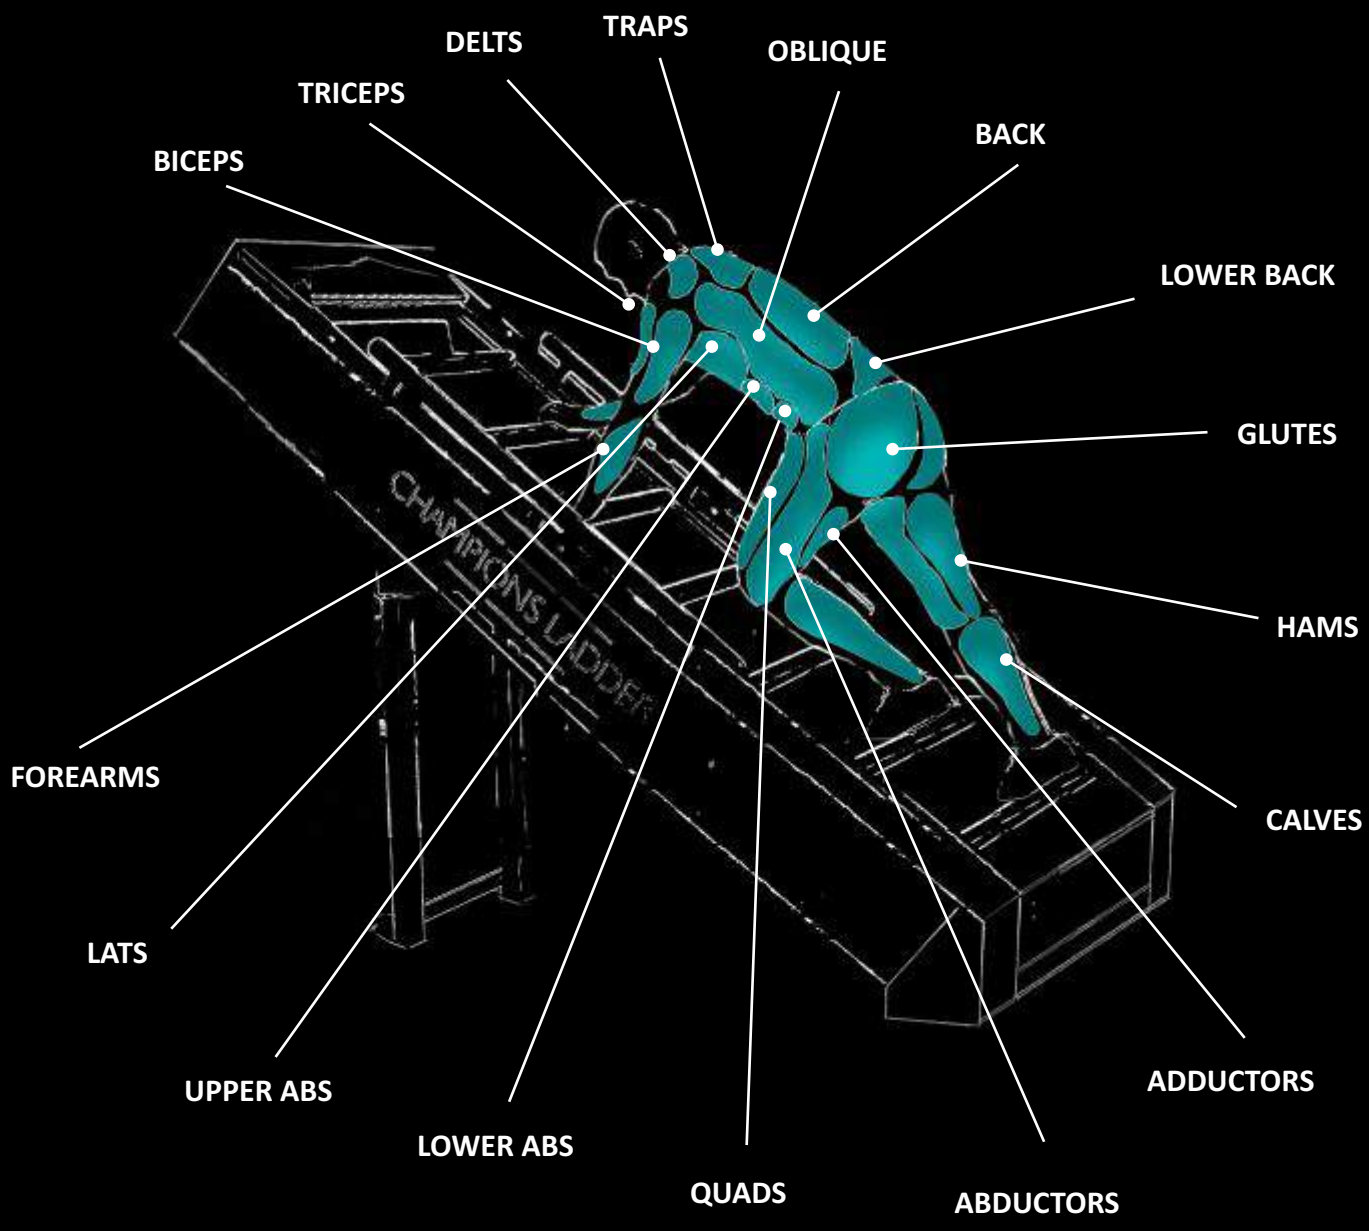

You can also choose from among many different challenges and climb to the highest and most iconic buildings, mountains and volcanoes. In addition, you can connect to one of many available streaming services and work out while watching your favorite TV show or movie on a beautiful 22-inch touch screen.

The Champions Ladder is the most effective cardio device in terms of burning calories and building aerobic and anaerobic endurance. It is designed for all those who love sports, climbing and leading a healthy lifestyle - regardless of whether you are a professional athlete or an amateur.

The advantage of the Champions Ladder training is the ease of use that has been achieved thanks to artificial intelligence and machine learning, which is unique among all cardio devices.

FULL BODY WORKOUT

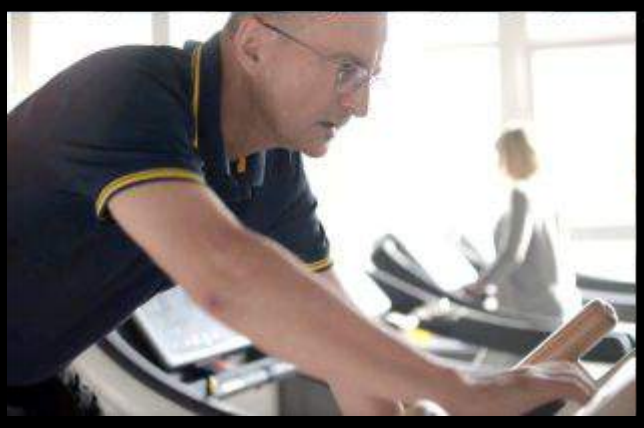

90 DIFFERENT EXERCISES

TRAINING

- **Full Body Workout** - the only cardio device in the world on which you can perform a multifunctional workout involving all the muscles of your body.

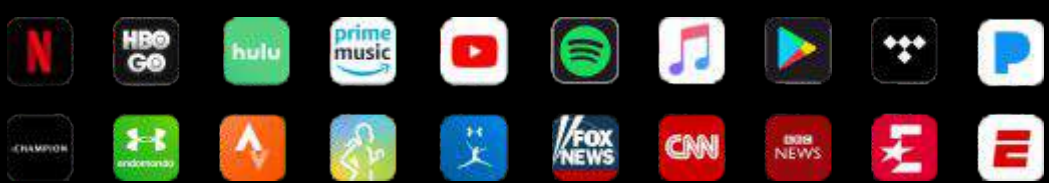

- **90 Exercises** - a huge number of training options with varying degrees of difficulty - you can choose from a range of 90 exercises or be creative and come up with new ones.

- **Amazing Cardio Session** - the most effective calorie burning from all cardio devices - you burn 250% more calories than on a treadmill.

- **Strength & Conditioning** - you will not only improve muscle strength, but also agility, plyometrics, speed, power and endurance.

- **HIIT (High Intensity Interval Training)** - HIIT involves fat loss, reducing weight and waist circumference, and your metabolic rate will be higher for many hours after the workout.

- **Warm-Up** - you can effectively warm up your muscles and joints to safely prepare your body for the rest of your training

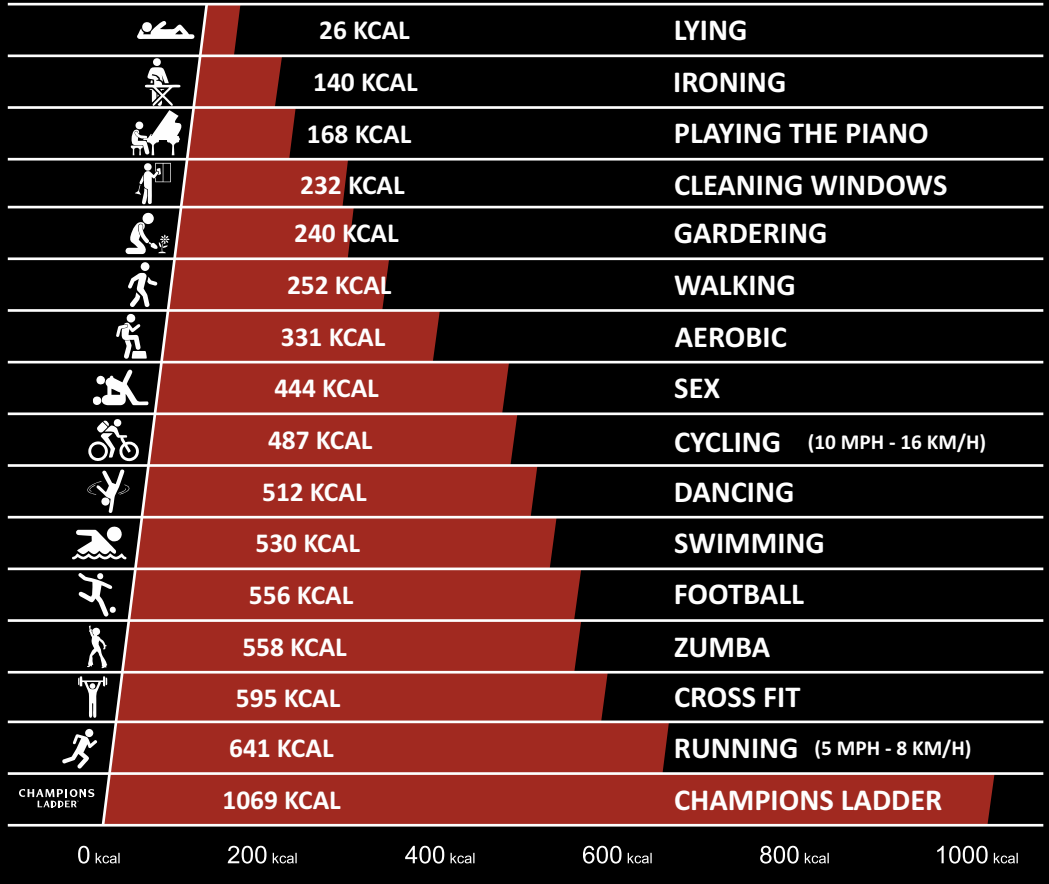

CALORIES BURNING

Training on the Champions Ladder is recommended by personal trainers and dieticians around the world. Several studies and tests have shown that Champions Ladder exercises accelerate the burning of calories and body fat.

Thanks to training on the Champions Ladder, you'll burn fat and reduce your weight, and your metabolic rate will be higher even for a few hours after your workout.

The chart below compares the burning of calories on the Champions Ladder with various activities and exercises.

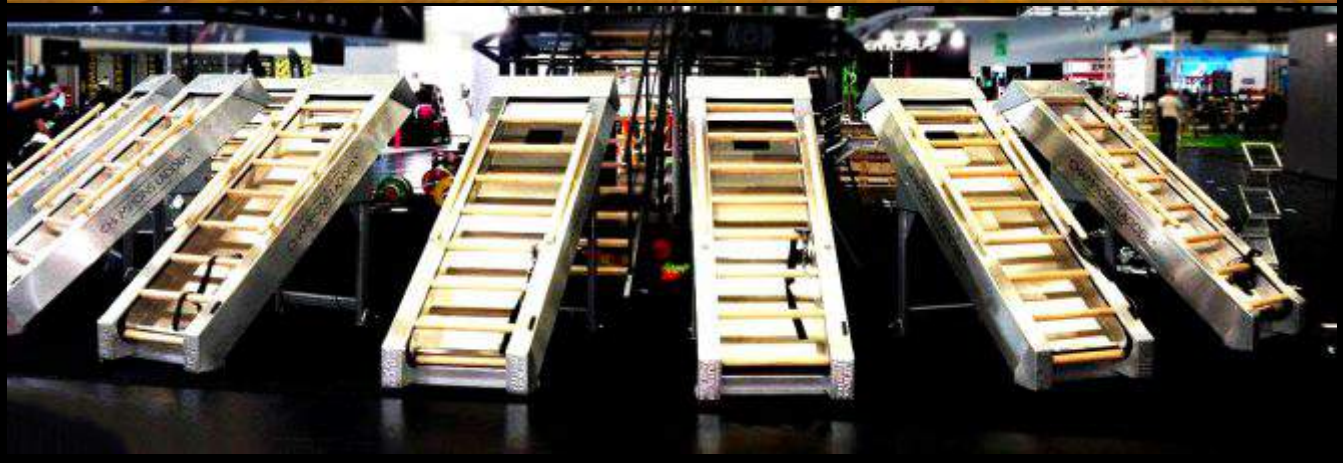

CALORIES BURNED DURING ONE HOUR WORKOUT

GROUP TRAINING

2 OR MORE LADDERS
=
GROUP EXERCISES & OFFICIAL CLIMBING TRAINING CENTER

- **Group Exercises** - combine several devices in the facility and create group classes.
- **Competition** - promote competition, both individual and team.
- **Main Screen** - display training statistics on the external screen or on the wall of the gym by using a projector.

TECHNOLOGY & SOLUTIONS

Artificial Intelligence & Machine Learning - an analysis of your movement to personalize your training - in Artificial Intelligence mode, you will feel that the device understands you and adapts to your training.

Mountains & Volcanoes & Buildings & Popular - climb mountains, volcanoes and buildings of varying difficulty - from Apple Park with a height of 50 feet to Mount Everest with a height of 29029 feet.

iCHAMPION™

iChampion - a unique training platform with comprehensive solutions for your physical activity. With iChampion you can not only store all your training statistics, but also join numerous Challenges and group classes through 3D Live Streaming and 3D VOD. The iChampion platform is the only 3D system in the world in which, in addition to image and sound, there is also the third dimension - speed adjustment and real-time control performed by the trainer. This is a real revolution!

3D Live Streaming - live training at specific times and conducted from several different locations around the world.

3D VOD - a collection of recorded workouts that you can join at any time - from home, work, your hotel or a fitness club.

Challenges (Buildings, Popular, Mountains & Volcanoes) - you can choose from dozens of presets or create your own - e.g. from your area.

PARTNERS:

SAMSUNG POLAR Bona BASKET BULLET™ QUINCY™ 122 LABS™

PLATFORMS:

android GET IT ON Google Play iOS Download on the App Store

iCHAMPION PRO APP

MAIN SCREEN

Select one of several options:

a) Selection of goals from mountains, volcanoes, buildings, and landmarks.

b) Create your personal goal.

c) Run 3D LIBRARY.

d) Set one of the 3 modes of work for the device.

SELECTION OF GROUP OF GOALS

Select group of goals:

MOUNTAINS: Mount Everest, K2, Nanga Parbat, Aconcagua, Denali, Mount Kilimanjaro, Mount Elbrus, Mont Blanc, Mount Kosciuszko, Mont Uluru.

VOLCANOES: Ojos del Salado, Mount Sidley, Mount Fuji, Mount Etna, Mount Vesuvius, Taal Volcano.

BUILDINGS: Burj Khalifa, CN Tower, One World Trade Center, Petronas Twin Tower 1&2, Willis Tower, Empire State Building, Wilshire Grand Center, The Shard, Eiffel Tower, Commerzbank Tower, Palace of Culture and Science, Great Pyramid of Giza, BIG BEN, Taj Mahal, Leaning Tower of Pisa, White House.

POPULARS: Falcon Heavy, Lighthouse of Alexandria, Avengers Tower, Barad-dûr, Mount Seler, The Pearl by "SKYSCRAPER", Wayne ENTERPRISES, Salesforce Tower, Hogwarts Castle, Chernobyl, Statue of Liberty, Titanic, Joker Stairs, Rocky Steps, Apple Park.

SELECT GOAL

Select your goal and enjoy the amazing training combined with achieving interesting climbing goals.

Every goal is a different distance to do. The simplest, such as Falcon Heavy, take about a minute. The longest ones, such as Mount Everest, are many hours of climbing, which are more pleasant if you spread them over 30-60 days of training.

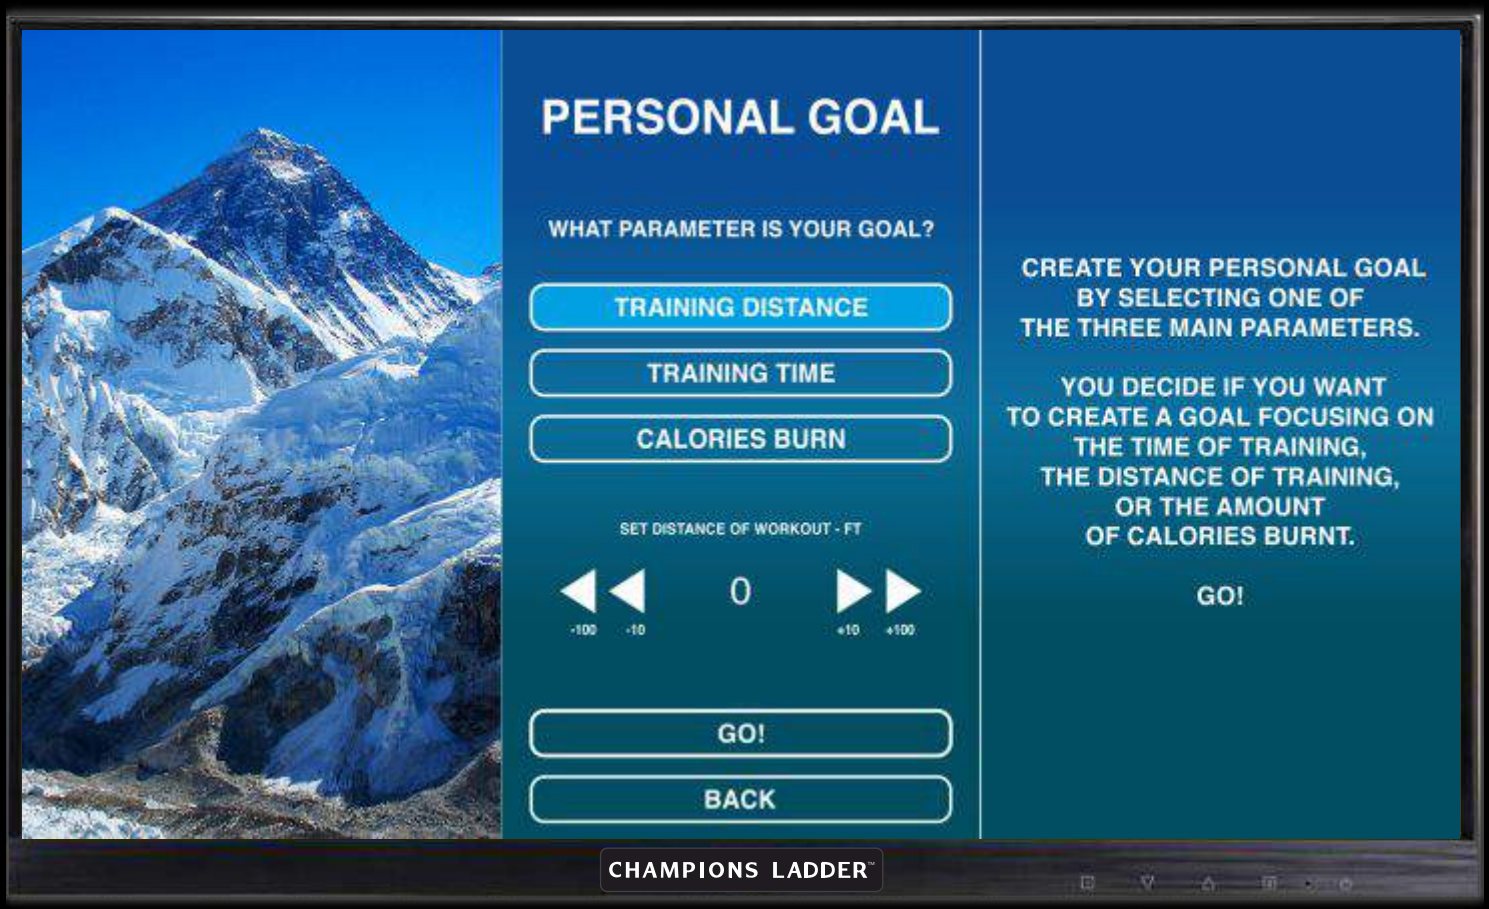

CONGRATULATIONS

After achieving a goal, iChampions Pro App will display the distance achieved, your time and the amount of calories burnt.

Take a photo and share it in your social media or send to friends and family. This will motivate both you to train more and achieve further goals, and your friends and family to train regularly and to improve their well-being.

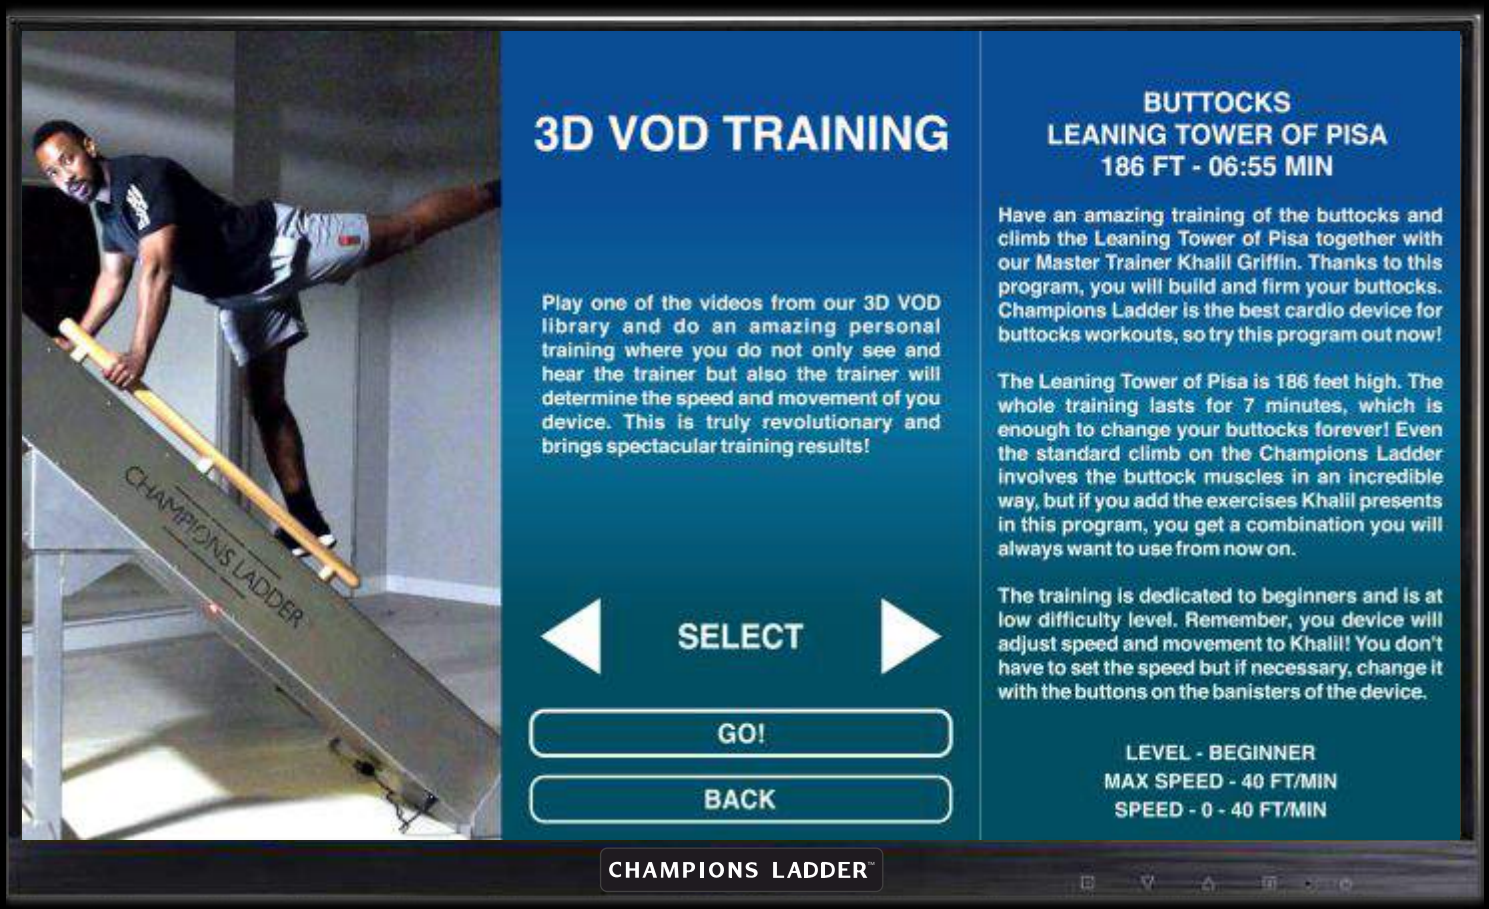

PERSONALIZING GOALS

You can personalize your goal in any way you want. You can select goals based on distance, time, or calories burnt.

At any point, you can suggest an update to the device with further goals by sending us an email to: info@championscardio.com

3D LIVE STREAMING & 3D VOD

3D LIVE STREAMING & 3D VOD trainings are truly revolutionary. You can run any training and you will not only see and hear the trainer but also the trainer can take control over the speed and the movement of the device. This training will revolutionize your training experience.

3D VOD consists of several dozen online trainings displayed on the screen of the device (ultimately, there will be 500 of them in 2020). The trainer in the videos climbs the specific goals together with you, but also shows exercises which can be done on Champions Ladder (we have described 90 different exercises!); naturally, if you selected a training which contains such exercises.

CLIMBING

STATISTICS

See the statistics below, do not let yourself
be overtaken by your competition in the area!

MOUNTAINS

25%

of the earth's surface is covered by mountains

700 000

(people visit the Himalayas annually)

120 000 000

(people visit the Alps annually)

320 000 000

(visit mountain areas in the USA annually)

750 000 000

(people spend their holidays in mountain areas annually)

1 000 000 000

(people live in mountain areas)

FITNESS CLUBS, GYMS, TRAINING CENTERS

175 000 00

(people have a membership in fitness clubs,
gyms and training centers)

OFFICIAL CLIMBING TRAINING CENTER

Join the global OFFICIAL CLIMBING TRAINING CENTER program by CHAMPIONS LADDER now and get a great opportunity to acquire a new group of customers who have so far not been interested in attending gyms in your area.

This group is a community of 750 million people who love hiking and mountain climbing and spend their free time and holidays in mountain areas.

This community of 750 million people is more than 4 times the community of people buying memberships in fitness clubs, gyms and training centers around the world.

DID YOU KNOW THAT...

- **by joining the OFFICIAL CLIMBING TRAINING CENTER by CHAMPIONS LADDER you can significantly increase the number of memberships purchased in your club?**
- **there are statistically 4 times more people in the vicinity of your club who go mountain climbing than those who have a membership in any club in your area?**
- **the vast majority of these people will not purchase a membership in your club if you do not offer them the best possible climbing training combined with running and mountain routes displayed on the screen?**

Do not wait and do not waste your club's potential. With the status of OFFICIAL CLIMBING TRAINING CENTER you would have the chance to reach a significant target group.

COMMUNITY

SOLUTIONS

For home training:

Champions Ladder has taken home cardio training to another level. Thanks to 3D REAL and 3D LIVE MOTION technologies, users can join Live Streaming or VOD training thanks to which they can see and hear the trainer, who remotely controls the movement and speed of their devices. THIS IS A REAL REVOLUTION IN TRAINING!
Users can also choose one of the training goals at any time and climb the most famous and highest mountains, volcanoes and buildings or work out by watching videos from the most popular streaming services on the display screen, which are available in the device's application.

For fitness clubs:

Champions Ladder is used in hundreds of fitness clubs around the world. The possibility of short but intensive training makes these devices ideal for club members who do not have a lot of time to stay at the club but want to achieve visible effects.In addition, users can choose from dozens of training goals on the device's screen and climb the highest and most famous mountains, volcanoes and buildings or during training simply watch a movie on Youtube, Netflix, HBO GO or AMAZON PRIME. Users can also connect to one of the Live Streaming or VOD training sessions and work out in a larger group.

For group exercises:

Champions Ladder is the only group exercise device which can be controlled by the trainer. It is the trainer who sets the movement and speed of the entire group's devices by setting everything in their mobile app. The group's statistics are displayed on a display screen or on the wall of the club using a projector. The group can also join a global Live Streaming training or compete with each other, first setting a common climbing goal for the group. The most famous and highest mountains, volcanoes and buildings are available.

For weight loss centers:

Training on the Champions Ladder is recommended by personal trainers and dieticians around the world. Several studies and tests have shown that Champions Ladder exercises accelerate the burning of calories and body fat. Thanks to training on the Champions Ladder, you'll burn fat and reduce your weight, and your metabolic rate will be higher even for a few hours after your workout.

For mountain climbing:

The Champions Ladder is a great device for all those who love the mountains –regardless of whether you are climbing as an amateur or as a professional. Training onthe Champions Ladder makes it much easier for you to overcome the difficulties that you will encounter in the mountains, and you will also build endurance for long mountain treks. Professional climbers around the world cannot imagine preparing for their expeditions without training on the Champions Ladder.

For Olympic climbing:

Sports climbing will debut at Summer Olympics in 2020 in Tokyo, Japan. There will be two events - one for men and one for women. The event will consist of three disciplines: lead climbing, speed climbing and bouldering. The winner of the event will be the athlete who performs best in these three disciplines.
Climbers who are going to participate in Tokyo and have a chance to win medals are basing their intense preparations using Champions Ladder.

For professional athletes and sports clubs:

Olympic champions, the best football clubs in the world, as well as NBA, NHL and NFL teams share one common element - most of them use the Champions Ladder in their training sessions. The reason is simple - no cardio device is more effective in building aerobic and anaerobic endurance.

For functional training and personal training:

The Champions Ladder is an essential device for every area of functional and personal training. It is the only cardio device in the world which enables to perform a versatile and effective Full Body Workout in a very short time. Users can choose one of 66 described exercises or create new exercises. In addition, Champions Ladder works very well as a circuit training device.

For CrossFit:

Champions Ladder is an ideal solution for CrossFit workouts. Athletes use Champions Ladder both in daily WOD training and for warming up before weightlifting.

For schools and universities:

Climbing treadmills are also often used by students of universities around the world. Champions Ladder is the only climbing treadmill suitable for users with a very low body weight (from ~70lb/~30kg). This means that it can be used even by children in primary schools. Climbing treadmills are also often used by students of universities around the world.

For rehabilitation:

Champions Ladder is ideally suited for rehabilitation purposes. Tilting the device at an angle of 40 degrees allows to relieve the spine and joints. In addition, in the Artificial Intelligence mode, the device understands and predicts the user's behavior, thanks to which the entire training is comfortable and safe.

For uniformed services:

The Champions Ladder is used by thousands of soldiers, policemen and firemen every day. There is no other cardio device in the world which provides such an effective endurance training for people who risk their lives to ensure the safety of their communities. The Champions Ladder also enables versatile fitness training, which is essential for the most demanding tasks of uniformed services.

CHAMPIONS TREADMILL™

32 INCH:
TOUCH SCREEN

SPEED:

"Innovation 2017: Champions Ladder is an innovative climbing treadmill, designed to build aerobic and anaerobic endurance. It is designed so that the user is always in complete control of their workout: the faster the user climbs, the faster the ladder's rungs move."

122 LABS™

About

122 LABS - we are a technology company created in honour of Jeanne Calment , who died in 1997, at the age of 122 years.

Our team's mission is to change the world so that living until the age of 122 will not be something unusual, and the entire ageing process will be based on Cognition, Mobility and Vitality. We are convinced that the tools which we provide to doctors will significantly increase the average life expectancy in the world and will completely change the lives of millions of elderly people. We believe that thanks to our efforts, the prevention of geriatric diseases, their diagnosis and treatment will reach an unprecedented level.

JEANNE CALMENT

The longest living person, whose age was officially confirmed was Jeanne Calment (1875-1997) from France, who survived 122 years and 164 days.
When she was one year old, Alexander Graham Bell patented the phone, and when she was 14 years old, the Eiffel Tower was built. Since her childhood, up to the age of 115, she always played sports, and later still maintained regular physical activity.

She swam, played tennis, roller-skated, at the age of 80 she began to train fencing, and after reaching 100 years she cycled...

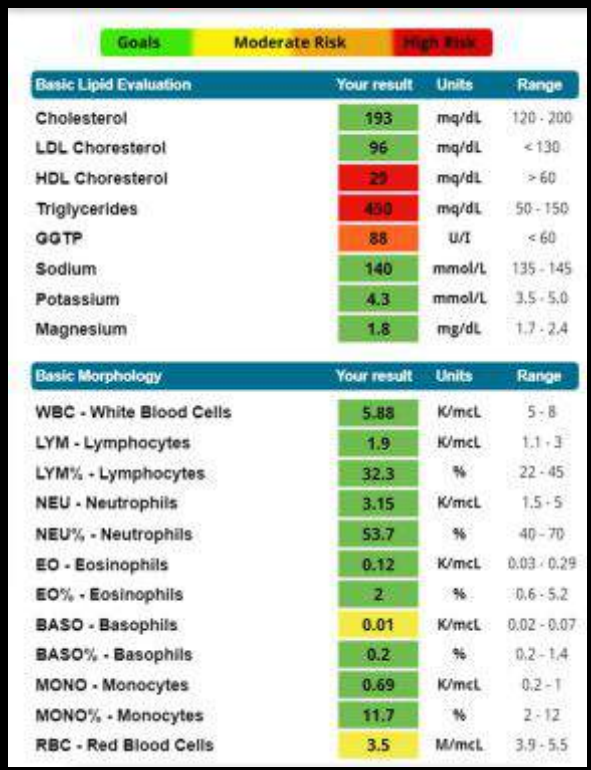

ANALYSIS OF THE PAST

We have created the **122 Ecosystem™** set of tools using artificial intelligence for cataloging and analysing the results of studies collected in the past by hospitals and patients themselves, and comparing these results with patients' life expectancy.

This type of analysis will enable to find dependencies between the patients' results and the length of their lives much faster and in a broader perspective.

ANALYSIS OF THE FUTURE

Goals | Moderate Risk | High Risk

Basic Lipid Evaluation	Your result	Units	Range
Cholesterol	193	mg/dL	120 - 200
LDL Choresterol	96	mg/dL	< 130
HDL Choresterol	29	mg/dL	> 60
Triglycerides	430	mg/dL	50 - 150
GGTP	88	U/I	< 60
Sodium	140	mmol/L	135 - 145
Potassium	4.3	mmol/L	3.5 - 5.0
Magnesium	1.8	mg/dL	1.7 - 2.4

Basic Morphology	Your result	Units	Range
WBC - White Blood Cells	5.88	K/mcL	5 - 8
LYM - Lymphocytes	1.9	K/mcL	1.1 - 3
LYM% - Lymphocytes	32.3	%	22 - 45
NEU - Neutrophils	3.15	K/mcL	1.5 - 5
NEU% - Neutrophils	53.7	%	40 - 70
EO - Eosinophils	0.12	K/mcL	0.03 - 0.29
EO% - Eosinophils	2	%	0.6 - 5.2
BASO - Basophils	0.01	K/mcL	0.02 - 0.07
BASO% - Basophils	0.2	%	0.2 - 1.4
MONO - Monocytes	0.69	K/mcL	0.2 - 1
MONO% - Monocytes	11.7	%	2 - 12
RBC - Red Blood Cells	3.5	M/mcL	3.9 - 5.5

122 Ecosystem™ also means access to medical and genetic research packages, which are analysed by our interactive machine learning platform, designed to help physicians diagnose and fight geriatric diseases. Appropriate studies will be recommended based on the analysis of collected and analysed results of other patients in the past and the combination of this data with the current state of the patient being examined.

ANALYSIS AND MONITORING

We will provide a family of products and applications entitled **Life Ecosystem™** . This is a set of wireless health monitoring devices **(Blood Pressure Monitor, ECG / ECG Monitor, Thermometer, Glucometer, Scale)** connected to the Life Ecosystem™ application.

The application does not store collected data from all devices, but using our interactive machine learning platform, it detects anomalies, threats and potential diseases. Such a diagnosis can be sent to people indicated by the user, including, for example, a family doctor.

MEDICAL DEVICES & TRANING

We strive to provide the best possible medical and rehabilitation products for the elderly, to ensure their correct and safe movement throughout their lives. One example is **Rehabilitation Circle**, which is the first and only such product in the world.

We can create and patent hundreds of new tests and medicines, but without daily physical activity it is much more difficult to maintain good health. Regularly exercising until old age and ensuring small amounts of physical activity in the last phase of life is the basis for its extension. Remember about that !

In addition, using our extensive training experience, we have created training plans for seniors so that they can exercise regularly, whether alone or with their children, grandchildren or guardians. All this will also be made available in the **Life Ecosystem™** application.

REHABILITATION CIRCLE

PLAN OF THE FLOORING

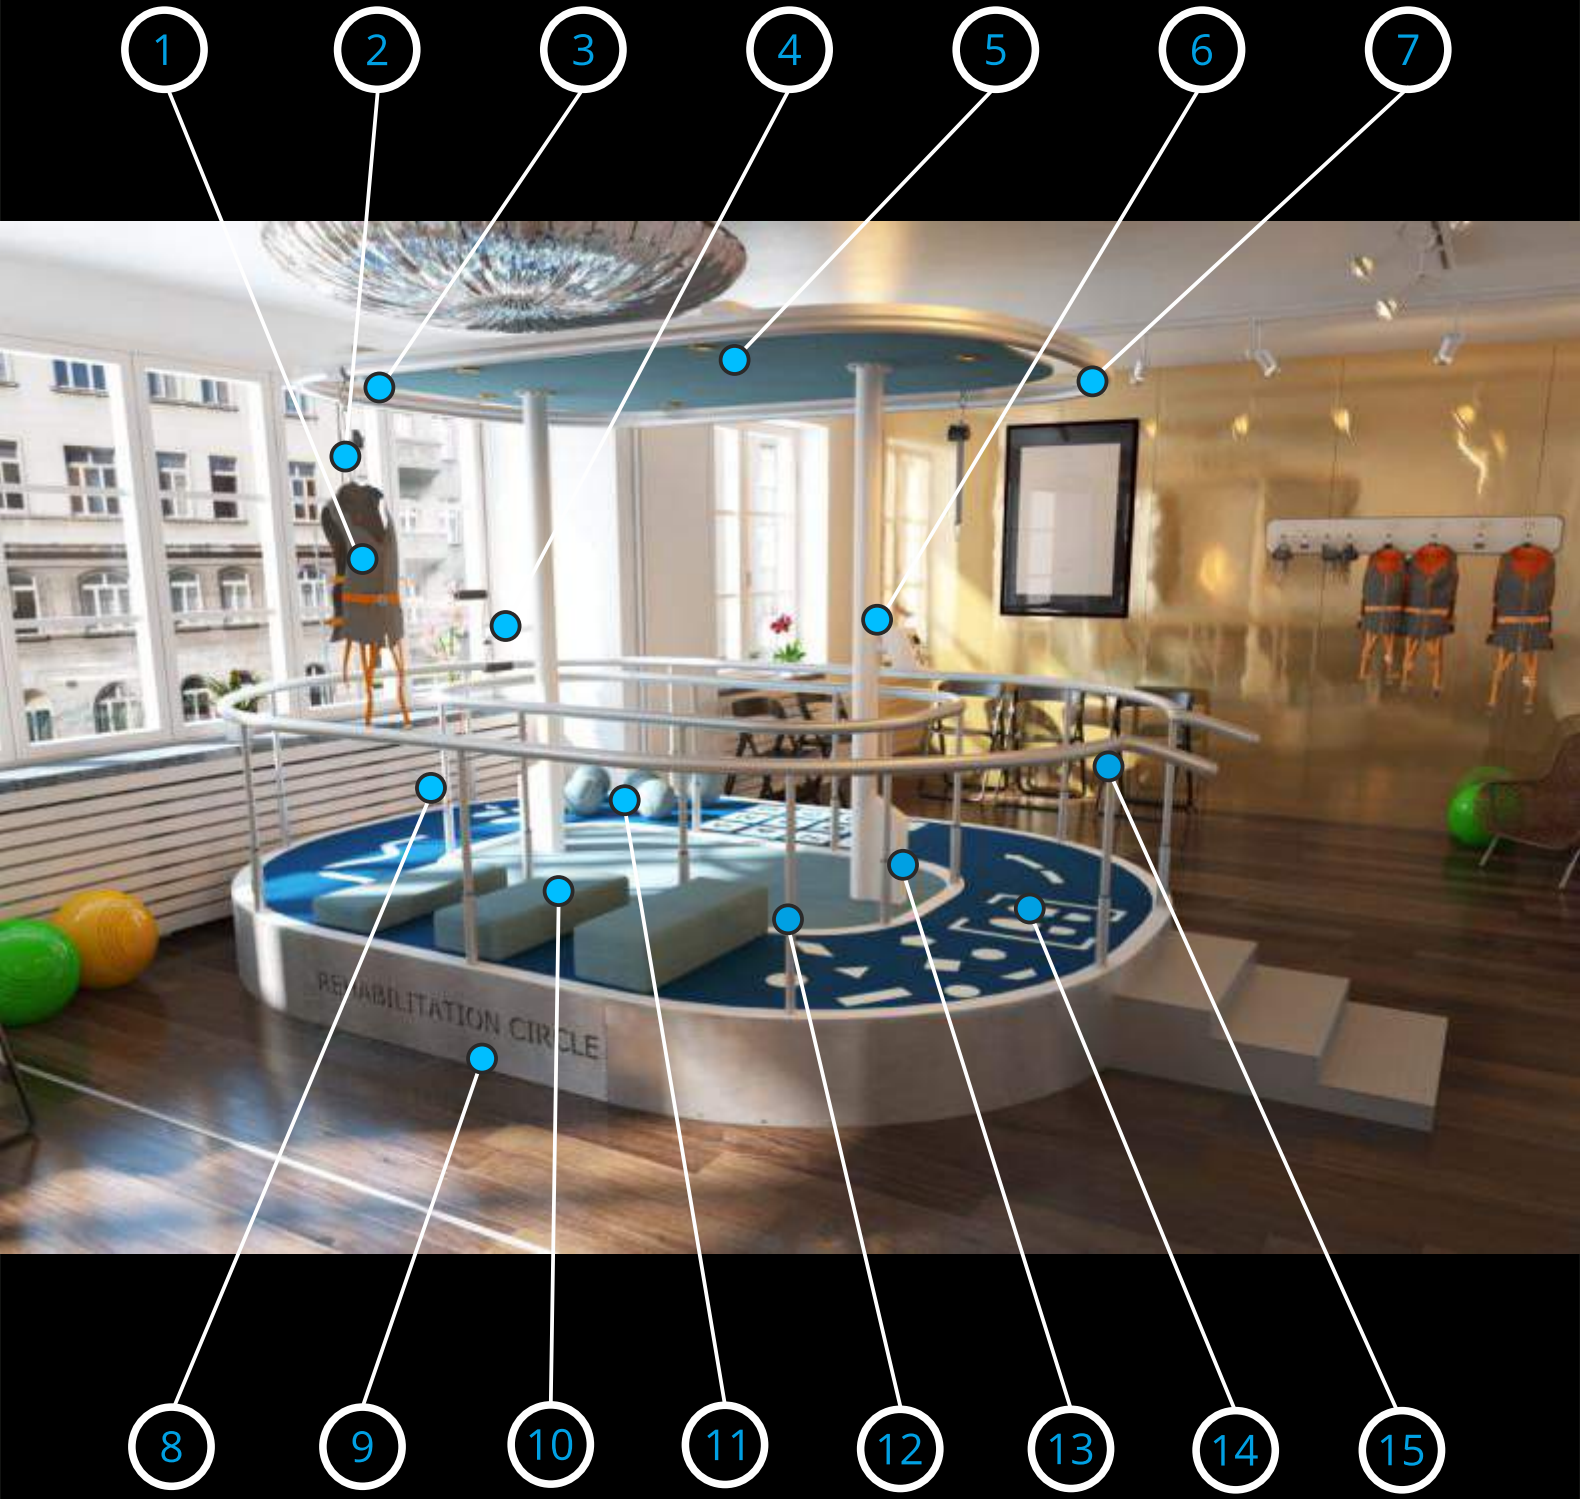

Rehabilitation Circle 360 is an innovative, proprietary device for the rehabilitation of elderly people and patients with severe injuries and after operations, in every age. The device is intended for nursing homes, rehabilitation centers, clinics and hospitals.

In 2013, 122 Labs began conducting research with the aim to create an exercise system which would ensure complete safety for people who have such needs. After 4 years of research, the Rehabilitation Circle 360 was created, which completely protects the user from falling and prevents injuries from getting worse.

The device is equipped with a safety belt that will always be activated when the device detects that the user might stumble. In addition, the device is equipped with a proprietary system of actuators which adjust the handrails with a single button. Therefore, each user can adapt them to their height, which makes exercising even safer.

The Rehabilitation Circle 360 route along which the patient moves is very easily modified and can be adjusted to the individual requirements of users. Rehabilitation Circle 360 has a 27-year warranty on structural integrity, which gives assurance to users that it is of the highest possible quality.

PRODUCT SPECIFICATION

www.122labs.com/rehabilitationcircle

REHABILITATION CIRCLE

1

VEST

A safety vest which completely absorbs the impact during a fall. Available in 7 sizes (C1 - CHILDREN, C2 - CHILDREN, S, M, L, XL, XXL).

2

SAFETY BELT

The safety belt secures the user during a fall. The belt is not blocked permanently and automatically adjusts to the user's height. Blocking occurs only as a result of a sudden extension of the belt during a fall. Available in two sizes (C - CHILDREN, S - SENIOR).

3

SAFETY SYSTEM

The safety system in combination with the vest and safety belt completely protects against the possibility of injury during a fall. It is made of stainless steel. to which they are very easy to keep clean.

4

ROTOR

The safety system in combination with the vest and safety belt completely protects against the possibility of injury during a fall. It is made of stainless steel. to which they are very easy to keep clean.

5

CONTROL PANEL

The device is electrically controlled. The panel can be used to turn on the device, the route lighting system, the LED lighting, and most importantly - adjust the height of the handrail.

6

ROUTE LIGHTING SYSTEM

The route lighting system consists of 6 separate light sources which perfectly illuminate the entire route.

7

LED LIGHTING

The upper safety system is illuminated by a strip of LED diodes.

8

STROOPS RESISTANCE BANDS

Stroops resistance bands are attached to one of the parts of the device.

9

STYLISH DESIGN

Most of the structure is made of stainless, ground steel. A unique design has been achieved thanks to the beautiful colour of the lighting.

10

ANY REPLACEMENT ELEMENTS OF THE ROUTE

The entire route of the device can be configured in any way, at the time of purchase or at any other moment in the future. Elements can be added even during the patient's exercise and this can be done e.g. by a physiotherapist.

11

VOGUE MATERIAL

All accessories are made of VOGUE material. It holds hygienic, non-flammability and strength certificates.

12

ELECTRONICALLY ADJUSTABLE HEIGHT OF HANDRAILS

One up/down button on the control panel allows to adjust the height so that it is appropriate for the user.

13

SYSTEM OF ELECTRIC ACTUATORS

The device has a system of electric actuators which regulate the height of the handrail.

14

SAFE SHOCK-ABSORBING FLOOR

The floor is made of a special plastic compound, which ensures its softness and shock-absorbing properties.

15

STAINLESS STEEL HANDRAIL

The device has both an external and an inner handrail. They are made of high-quality stainless steel, thanks to which they are very easy to keep clean.

WHAT PEOPLE SAY

ZARA STONE - FORBES

"By 2060, over 98 million Americans will be over 65 years old — that's 24% of the population. No doubt a large number of these folk will also be in jobs - around 27% of men over 65 years old are predicted to be working in 2022. That shows an obvious need for companies that cater to an aging population, addressing everything from healthcare to entertainment."

JEANNE CALMENT

"Always keep your smile. That's how I explain my long life."

RUTH RENDELL

"People are still being put into geriatric wards when they don't need it.

They need treatment, not just being put into bed and fed."
